

SafeConnect

For Faculty and Staff users.

When connecting to the network the first time your browser will open automatically and be redirected to the following login page.

The screenshot shows the Hollins University SafeConnect login interface. At the top center is the Hollins University logo, with "HOLLINS" in a large, green, serif font and "UNIVERSITY" in a smaller, green, sans-serif font below it. The page is split into two main sections by a vertical line. On the left, under the heading "Welcome to the Faculty/Staff Network", there is a message: "To access network resources, please sign in." followed by "Students, please connect to the 'HollinsStudent' wireless for network access." On the right, under the heading "Sign In", there are two input fields: "Hollins Username" and "Password". Below these fields is a checkbox labeled "I accept the Acceptable Use Policy" and a blue "Sign In" button.

Once you login with your Hollins Active Directory credentials you will be logged in to the network.

****Note:** As long as your computer/device has been on the network in the past 30 days you will not see a login page when you access the network. If it has been longer than 30 days then you will see the login page to authenticate.

If you do not have any Antivirus software installed you will be put in quarantine until you install the software.

Action Required

Your device is out of compliance with our network policy, but don't worry! Compliance issues are usually minor and simple to fix.

This is only a warning.

Just follow the steps we've outlined for you or you may lose access to the network.

Your device does not have anti-virus software installed.

Our policy requires that anti-virus software is installed, running, and up to date.

- 1 Choose an anti-virus product to download install.
- 2 The following products are free and perform well.
 - AVG
 - Avira
 - BitDefender
 - Comodo
 - Microsoft Security Essentials
- 3 Download and install the Anti-virus application.
- 4 Click "Check Again" below.

Check Again

Once the antivirus software is install click the Check Again button and will it will continue and give you access to the network.

You're good to go!

Your device meets our network security requirements.
Click "Continue" below to access the network or you will be automatically redirected in 5 seconds...

Continue

For Mac users after you login you may see this page to download the policy key. Click the Download button and install like normal.

Download the Policy Key

In order to ensure a safe environment for all users of the network, we require that certain devices install the Policy Key.

The Policy Key validates that your system meets the organization's standards per the [Acceptable Use Policy](#).

[See the FAQ](#) for more information about the Policy Key.

Download Now

Click Download Now to install the Policy Key.

Once the policy key is installed you will need to come back to the web page and click the "I'm done installing" button and it will continue on and let you access the network.

Install Policy Key

In order to ensure a safe environment for all users of the network, we require that certain devices install the Policy Key.

The Policy Key validates that your system meets the network's security standards as per the school's [Acceptable Use Policy](#).

[See the FAQ](#) for more information about the Policy Key.

Follow the instructions below to complete the installation.

- 1 Save the file to your preferred directory.
- 2 After the download is complete, navigate to the file and run it.
- 3 Follow the instructions on the installer.
- 4 Click "I'm done installing" below.

I'm done installing

Once you click the "I'm done installing" button you will be on the network.
